Portfolio: wreckitbrunson.dev

SUMMARY

Web developer with a background in manual User Acceptance Testing, peer to peer training, and documentation writing. Trained at University of Oregon coding boot camp and earned a certificate in full-stack web development. Problem-solver who prioritizes human-oriented design/development. Strong at testing and building applications, start to finish.

TECHNICAL SKILLS

Software/Platforms: NodeJS, React, MongoDB, Microsoft Office VBA , Express.JS
Software Languages: HTML, CSS, Javascript, Typescript, Python, SQL (Oracle, Postgres, Microsoft), NoSQL (MongoDB)
Other Skills: Continuous Integration/Continuous Development, Software Testing (Manual and automated w/ Jest and Cypress)

PROJECTS

The Gamer's Journal
Link to GitHub: https://github.com/JohnBrunson/the-gamers-journal
Link to Deployed Project: https://johnbrunson.github.io/the-gamers-journal/

- The project is a simple space to record your progress in regard to video games
- Designing and implementing the architecture on how items would render to the screen and how items would save to local storage (effectively a faux database). Additionally, wrote the readme.
- HTML, CSS (Bootstrap), Javascript, Local Storage

Dinner and a Movie
Link to GitHub: https://github.com/JohnBrunson/dinner-and-movie
Link to Deployed Project: https://dinner-and-movie.onrender.com/

- Dinner and a Movie simplifies the decision making process by pairing your favorite dinners with great entertainment.
- API and Database Backend creation, design, and implementation as well as rendering data to the screen.
- React, PostgreSQL, Node.JS, Typescript

Habit-Tool
Link to GitHub: https://github.com/JohnBrunson/habit-tool
Link to Deployed Project: https://habit-tool-epa6.onrender.com

- The project is a simple habit tracker.

- The backend is very simple since the project was built in two weeks. The idea is to simply track habits. It's a simple document (database table) with sub documents (smaller tables).
- Technologies used: MongoDB, Express.js, React, Node.JS, Typescript, CI/CD

EXPERIENCE

Jr. Business Analyst/Business Analyst Mobile & Web 2020 – Present
Freedom Mortgage
Boca Raton, FL (Remote)

Technical Lead/UAT Tester/occasional manual QA, responsible for writing and executing testing in response to Acceptance Criteria from the development team, summarizing and documenting test results, and bugs for both internal and external clients, vendors, QA and Developers
Key Accomplishments:

- High Flyer award for exceptional performance and current holder of manager's highest ranking given for performance
- Successfully led efforts for deployment of CARE project without major errors and delivered the project on time.
- Prevented several errors that would have cause loss of confidence, monetary losses in mid five figure to low six figure range, and more development time for a vendor's product.
- Established testing procedures for the department for consistent testing and review and trained the department on how manual testing should be done.
- Established response procedure for internal technical support and took response times from 2 weeks to twenty-four hours.

CSR/Loss Mitigation Call Team/Contact Strategy Officer/Analyst (Business Analyst)
2010 – 2019

Seterus/IBM Lender Business Process Services

Beaverton, OR

Data analyst/UAT Tester, Process documentation maintainer, VBA programmer and system login troubleshooter/maintainer, and Business liason between Developer/QA for Dialer software front end.

Key Accomplishments:

- Established written processes for UAT testing and maintained job aids, Separation of duties documentation, process flows and other management of documentation for the department and other departments for internal/external use and reference.
- Developed reporting VBA scripts for senior management and internal use
- Performed UAT for synTelate and other Avaya telephony products.
- Developed compliance reporting and execution process for internal compliance projects and was assigned to hand it off to others.

EDUCATION

Software Development Bootcamp Certificate: University of Oregon, Eugene Oregon
[October 2024-April 2025]
A 24 week intensive program focused on gaining skills in software development with technologies including: HTML, CSS, Javascript, Typescript, Python, MongoDB, React, PostgresSQL, CI/CD, and many other Software Development technologies.
